

PUZZLE OF THE WEEK

Monday 23 November 2026 · Hashi · Hard

HOW TO PLAY

Join the sandbanks with straight walkways. A walkway runs up and down or left and right, and only between two sandbanks that stand in line with nothing in between.

A number on a sandbank counts its walkways. When it says four, exactly four walkways leave it. Two walkways may run side by side between the same pair, and that counts as two.

Walkways never cross, and when the water is finished every sandbank can be reached from every other.

Exactly one solution, found by the program that made this puzzle.
