

PUZZLE OF THE WEEK

Monday 14 June 2027 · Slitherlink · Hard

HOW TO PLAY

Draw one closed loop along the grid lines. The otters need a single river: no branches, no crossings, no second loop.

A number in a patch counts its sides. It says how many of that patch's four sides the river runs along, from 0 to 3. A patch with no number says nothing at all.

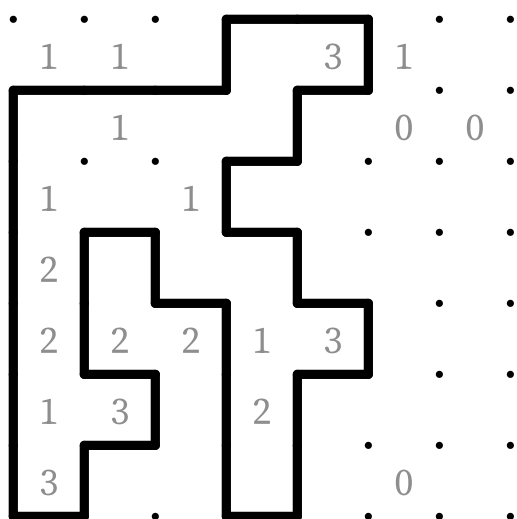

Exactly one loop fits every number. A cross on a side is your own note that the side stays dry.

Exactly one solution, found by the program that made this puzzle.
