

PUZZLE OF THE WEEK

Monday 6 September 2027 · Masyu · Hard

HOW TO PLAY

Draw one loop through every swan. The loop runs from the middle of one cell to the middle of the next, up and down or left and right, never diagonally, and it never crosses itself, branches, or passes through the same cell twice.

A white swan means the loop goes straight through it and turns in the cell just before or just after. A black swan means the loop turns in that cell and goes straight through both neighbouring cells.

Cells with no swan may be left out of the loop altogether. Exactly one loop fits every swan.

Exactly one solution, found by the program that made this puzzle.
