

PUZZLE OF THE WEEK

Monday 1 February 2027 · Numberlink · Medium

HOW TO PLAY

Every pair of nests belongs to one pair of herons.
Draw a flight path between the two nests of every pair. A path steps from one cell to the next, up and down or left and right, never diagonally, and it never runs beside itself.

Paths never cross. Once a cell belongs to one path it is closed to every other.

Every cell of the marsh is used: no cell is left over when the marsh is finished.

Exactly one solution, found by the program that made this puzzle.
