

## PUZZLE OF THE WEEK

Monday 11 January 2027 · Numberlink · Easy

---

### HOW TO PLAY

Every pair of nests belongs to one pair of herons.  
Draw a flight path between the two nests of every pair. A path steps from one cell to the next, up and down or left and right, never diagonally, and it never runs beside itself.

Paths never cross. Once a cell belongs to one path it is closed to every other.

Every cell of the marsh is used: no cell is left over when the marsh is finished.

*Exactly one solution, found by the program that made this puzzle.*
