THE NAMES

- ☐ **CRAB**
- ☐ **DOLPHIN**
Bottlenose dolphin
- ☐ **JELLYFISH**
- ☐ **OCTOPUS**
- ☐ **SEAHORSE**
- ☐ **SHARK**
- ☐ **STARFISH**
- ☐ **TURTLE**
Sea turtle
- ☐ **WALRUS**
- ☐ **WHALE**
Blue whale

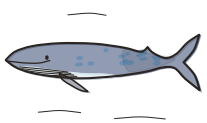

Ocean Life: answers and facts

Each fact below is a sentence we wrote from the Wikipedia page named under it. All pages were read on 26 September 2026.

The drawings are drawn in code by ARLing, line by line, with no photographs and no AI generated images.

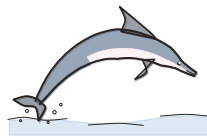

The coloured drawings show one way to colour them; any colours are fine.

Blue whale

The blue whale is the largest animal known to have ever existed, up to about 30 m long.

en.wikipedia.org/wiki/Blue_whale

Bottlenose dolphin

Bottlenose dolphins address one another by copying each other's signature whistle.

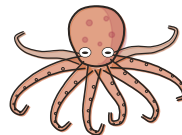

en.wikipedia.org/wiki/Common_bottlenose_dolphin

Shark

A shark's skeleton is made of cartilage, and its teeth are constantly replaced throughout life.

en.wikipedia.org/wiki/Shark

Octopus

An octopus has three hearts and bluish blood, and two thirds of its neurons are in its arms.

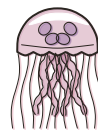

en.wikipedia.org/wiki/Octopus

Sea turtle

Sea turtles cannot pull their heads into their shells; females nest on the beach where they hatched.

en.wikipedia.org/wiki/Sea_turtle

Jellyfish

Most jellyfish have no central nervous system; the group has existed for at least 500 million years.

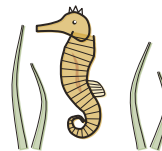

en.wikipedia.org/wiki/Jellyfish

Starfish

Most starfish have five arms, and some species can regrow an arm they have lost.

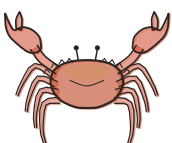

en.wikipedia.org/wiki/Starfish

Seahorse

A female seahorse lays up to 1,500 eggs in the male's pouch, and he gives birth to the young.

en.wikipedia.org/wiki/Seahorse

Crab

Many crabs can run swiftly sideways, though others walk forwards.

en.wikipedia.org/wiki/Crab

Walrus

A walrus uses its tusks to keep holes open in the ice and to climb out of the water onto it.

en.wikipedia.org/wiki/Walrus
