Great Inventions: answers and facts

Each fact below is a sentence we wrote from the Wikipedia page named under it. All pages were read on 26 September 2026.

The drawings are drawn in code by ARLing, line by line, with no photographs and no AI generated images.

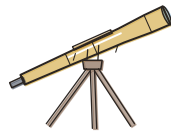

The coloured drawings show one way to colour them; any colours are fine.

Wheel

A wooden wheel and axle found in the Ljubljana Marshes in Slovenia is over 5,000 years old.

Telephone

In 1876, Alexander Graham Bell got the first US patent for a device that clearly reproduced a human voice.

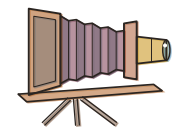

en.wikipedia.org/wiki/Telephone

Microscope

Compound microscopes appeared around 1620; in 1676 van Leeuwenhoek reported micro-organisms.

en.wikipedia.org/wiki/Microscope

Camera

In the early days of photography, a single exposure often lasted several minutes.

en.wikipedia.org/wiki/Camera

Bicycle

The Rover, made in Coventry in 1885, is usually described as the first recognizably modern bicycle.

en.wikipedia.org/wiki/Bicycle

Light bulb

A light bulb glows because its filament is heated; less than 5% of the energy becomes visible light.

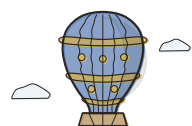

en.wikipedia.org/wiki/Incandescent_light_bulb

Gramophone

Emile Berliner coined the name gramophone for players of flat discs with a spiral groove.

en.wikipedia.org/wiki/Phonograph

Hot air balloon

The first untethered manned hot air balloon flight took place in Paris on 21 November 1783.
