Magpies

100 Nonograms puzzles

Every puzzle has exactly one solution, and every one of them was checked by program before it was printed.

How to play Magpies

NONOGRAMS

- 1 The numbers beside every row and above every column give the lengths of the blocks of filled cells, in order, with at least one empty cell between two blocks.
- 2 A filled cell is a cell a magpie left something shiny in. An empty cell is nothing. Work out from the numbers alone which is which.
- 3 Exactly one picture fits every number, and it can always be reached by reasoning, never by guessing. A cross is your own note that a cell stays empty.

Magpies: 100 Nonograms puzzles

Published by ARLing s. r. o., Bratislava, Slovakia. arling.sk/games

Every puzzle has exactly one solution, verified by program: the generator keeps a puzzle only when its own solver finds exactly one filling and reaches it by rules alone, without guessing.

Puzzles generated and typeset by program. 120 pages. First edition.
