Voles

100 Nurikabe puzzles

Every puzzle has exactly one solution, and every one of them was checked by program before it was printed.

How to play Voles

NURIKABE

- 1 Every number is a vole family, and it says how big their island is, the number's own cell included. Shade the rest of the meadow as water so that every island holds exactly one number and exactly that many cells.
- 2 Islands never touch by a side. Two islands may sit corner to corner, never side by side, or they would be one island with two numbers.
- 3 The water always hangs together as a single sheet, and no two by two block is ever all water.

Voles: 100 Nurikabe puzzles

Published by AR Ling s. r. o., Bratislava, Slovakia. arling.sk/games

Every puzzle has exactly one solution, verified by program: the generator keeps a puzzle only when its own solver finds exactly one filling and reaches it by rules alone, without guessing.

Puzzles generated and typeset by program. 108 pages. First edition.
